

KEG - TECHNIK

MICROMAT M 2/2 Hybrid

Hybrid
KEG-internal
cleaning and filling machine
and One-Way-KEG filling machine

m+f / **KEG-TECHNIK**

The highest standards in KEG cleaning and filling

With the Top seller solution from m+f KEG-Technik our Micromat M2/2-b, you can clean and fill up to 35 stainless steel KEGs at 50 liter/hour. Top hygienic design and many years of experience give you the highest standard of cleaning and filling of your product.

Extend your business with the Hybrid solution

To be able to respond within a minute to customer demand, you change this Micromat M 2/2 Hybrid machine into a One Way KEG filler in just 1 minute changeover time. Most commonly used One Way KEGs can be filled with this solution. Add the headslider and the headnut to your needs and you are flexible for the next years to come.

Safe and clean filling

With our special controls there is no possibility to overpressure the One Way KEGs as well there will be no danger for the operator. Before and after every fill we clean the filling head with hot water and a steamburst, to minimise the risk of contamination.

Call or mail our specialists for the best solution for your business!
